**Reading:** Students will be preparing for MCA. They will practice reading skills such as identifying evidence to support the answers; identifying the main idea and supporting details; identifying character traits; using context clues to determine meaning.

**Writing:** Students will continue to state and give reasons for their opinion. They will use transition words and phrases to link their opinion and reasons. They will also identify reasons why students like the books they like (reasons based on evidence from the text).

**Skills:** Students will review the triple consonants of "nqh," and "nrh." They will use reduplication of words to emphasize emotions and/or actions. They will make lists of the English chunks for “oy” and “ea” words.

**Math:** Students will learn the traditional and easiest way to multiply multi-digit numbers; divide using manipulatives; and use the long division method to divide. They will also interpret frequency tables and determine the mean, median, and mode of a data set.

**Important Notes:**

**Homework:** Remember to read daily for at least 20 minutes!

**Tou Saik Lee Visitation:** He is known to teach and inspire as a public speaker and performer. He will facilitate a creative writing and performance for fifth graders. He and fifth graders will perform on Friday, March 13th at 12:30 p.m.

Please call me with questions or comments.
