

BLENDER BIKE CARE

PITCHER CLEANING INSTRUCTIONS

Care of the Blender Bike pitcher requires 3 steps:

- 1). Before you plan to start blending, take blender pitcher to your Nutrition Services staff and have them rinse and sanitize the pitcher.
- 2). **Immediately** following your smoothie event, *you are responsible for washing out the pitcher, spatula, and wiping off the bike.* The spatula and pitcher should be washed with warm water and dishwashing detergent.
- 3). After pitcher has been washed and all food particles removed, once again have Nutrition Services staff rinse and sanitize the pitcher.
- 4). Be sure the pitcher, lid and spatula are thoroughly dry before repacking in basic kit.
