

Mission

The Southeast St. Paul Early Learning Coalition builds intergenerational communication and information bridges in our community to ensure that every family and resident accesses the resources they need and want.

Who are we:

We are an invested, action-oriented group made of neighbors, parents, non-profit organization, businesses, faith-based organizations and schools; we collaborate to support and build upon a resourceful community.

We recognize:

- Children are nurtured well within the context of their family and community.
- Families and communities foster hopes and dreams for their children.
- NO ONE advocates for children as well as their family and surrounding community.
- Community efforts toward young children are more effective and longer lasting when community members dedicate their time and talents.

We hope:

- to more fully understand the community's hopes and vision for their children.
- to participate in early learning community initiatives designed with/by, and representing, the community.
- to address early learning topics relevant to each community.
- to foster networking opportunities for current and potential partners.

Your commitment would include:

- Participating in conversations about young children and their families with other partners
- Advancing the determined goals and initiatives of the coalition
- Participating in the Community Assessment
- Sharing responsibility for completion of tasks for the benefit of children and families within the community
- Ongoing recruitment of additional partners

The benefits include:

- Shared understanding and vision for children and families in the community
- Regularly facilitated conversations about, and action plan for, young children and their families
- Partnerships with schools and communities to support promotion of early learning topics
