Classroom Announcements

Hello Families,

I’m so happy to welcome all students back to school (again) in the new year! We have an amazing group of children that found many creative ways to share their thinking in the Seesaw activities while at home. Thank you for helping your child get to our daily Google Meets and to complete the learning activities.

As we are still in the middle of a big surge of increasing cases of Covid and now with flu cases on the rise I encourage families to closely monitor for any symptoms of sickness. If you are seeing symptoms of sickness, please keep your child home and let me or the office know as soon as possible.

What Are We Learning About?

Our fourth Area of Study is called Adapting to Our World. We will focus on how we adapt to changes in the weather personally (clothing, activities), in our families (foods, shelter) and in our communities (habitats, migration and hibernation and how these connect to human adaptation). We will observe environmental changes in the weather, plants and water.

We will be turning our Dramatic Play area into a skating rink and warming house/cafe in the coming week and have added arctic animals in snow and ice to the sensory table.
