

LEAP Student Survey 2022

Highlights

- On March 28th, students at LEAP High School were given a survey regarding their experiences at LEAP. The total enrollment number at LEAP is 152 and the survey was completed by 130 students.
- The survey was given out in three different languages: English, Spanish, and Somali.
- Results were analyzed for all the surveys; a majority of the surveys were completed in Spanish.
- 16 students reported that they spoke more than one language at home.
- Most students reported that it was their first year at LEAP.
- Survey questions that contained an “other” category as a response were removed during analysis due to respondents only being able to write in their answer when selecting the “other” category if they took the English version of the survey. Students who took the Spanish and Somali versions could only select the “other” category as a response but were not given the opportunity to write in their response.

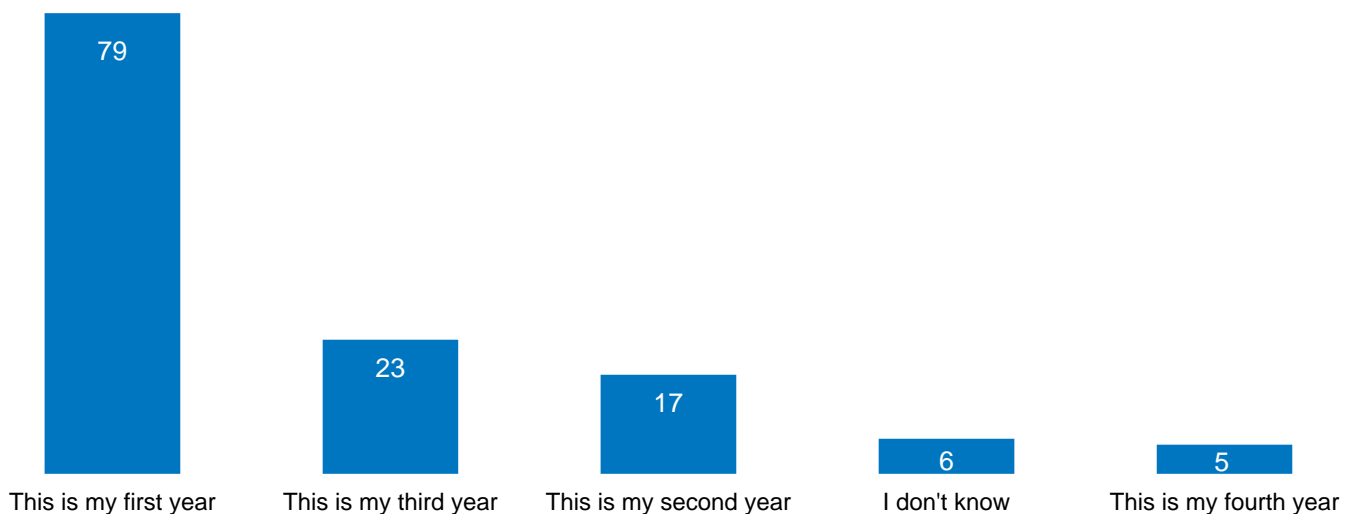

Number of surveys by language
