Building Construction Project
Humboldt High School’s building is being remodeled!

What changes will the school have?
- Two, three-story additions will provide:
  - A "house" for middle school students and relocating the building’s main entrance so it is next to the parking lot
  - The second addition will provide more appropriately sized classrooms and other learning spaces
- An outdoor plaza will be incorporated into the entrance for outdoor learning opportunities
- Making classrooms larger for more flexible learning
- Co-locating the Career and Technical Education and Fine Arts programs so students can easily collaborate together across programs
- Relocating the administrative offices next to the main entrance for a safe and secure entryway

When will this construction project happen?
- June 2017: Construction begins
- August 2020: Project completed

Will students still be able to attend the school during construction?
Yes! School will be conducted as usual during construction.
