During the pre-year and mid-year assessment periods, the analysis of multiple data points informs decisions regarding instructional strategies, small group rotations, and teaching focuses during the literacy block. The end-of-year assessment period provides multiple data points to determine individual student growth. Not all parts of the assessment battery are administered to all students during each assessment window. A student's grade and level of literacy development will determine which assessments to administer. See the tables on pages two and three of this document for assessment administration guidance. Throughout each assessment window, whole-class instruction will continue. The assessment window allows for individual screening of students during literacy work time/small group instructional time. Information on progress monitoring will be forthcoming.</p>
