Classroom News

Hello Parents/Guardians,

We will be going to Como Planetarium in October. We will let you know about the exact date because we are still working on scheduling. Please, remind your child to bring his/her winter gear to school every day as the weather is getting colder and windy.

School Supplies

Students need four notebooks for Morning work, math, writing and skills block.

The classrooms are in need of dry erase markers with a chisel tip. Students and teachers need them for different learning activities.

Homework

In third grade, we will give homework packets on Fridays and it is due the following Friday. It will be a combination of reading and math.

Each student is expected to bring the homework by the due date. If they do not, homework is part of your child’s report card and this can result in a low grade.

Transportation Reminders….

-Please send bus update with your child to teacher as soon as possible

-If you are picking up your child early for the day, call school 651-744-3290 before noon.

School Rules

Please remind your child about school rules. It is important that your child follow rules at school. It is a school policy that students cannot wear hoodies in school.

Science

We are working on safety, rituals, and routines. We will look into the nature of science and engineering.

Social Studies

We are learning the characteristics of a democracy society and how we can improve where we live. Students will learn about the three branches of the federal government: legislative, executive, and judicial.

Conferences

Evening conferences

Tuesday November 12 from 2:45
Reading

We are learning the rituals and routines in reading. We are learning ways to develop reading habits, making choices and picking just right books to read, distinguishing literal from non-literal languages in texts, and establishing reading partnerships.

Writing

We are launching Writer’s workshop. Students are working on writing about their favorite person, place and thing to build writing stamina.

Math

- Read, write, and represent whole numbers up to 100,000
- Use time, money and temperature to solve real-world and mathematical problems
- Make change up to one dollar in several different ways, including with as few coins as possible
- Place – Value.

Day conferences

November 15
